PROFESSIONAL SUMMARY

Bilingual Systems Engineering student (English C1) focused on software engineering, quality assurance, DevOps, and artificial intelligence. Currently doing QA for business processes on the BBVA project at Accenture. Hands-on experience building full-stack and cloud-native applications with Java, TypeScript, Python, React, NestJS, FastAPI, Docker, Terraform, Azure, and AWS, applying SDLC, Scrum, and CI/CD practices. Global Finalist in the NASA Space Apps Challenge 2025 (top 45 of 18,000+ teams), member of the ACOFI University Committee, and Research Assistant in software engineering at ECI after three academic monitor roles.

WORK EXPERIENCE

Custom Software Engineering Associate – QA Support Jul 2026 – Present

Accenture | BBVA Project | Bogotá, Colombia

- Perform quality assurance for multiple business processes using CAP and Bonita for process administration and BPM workflow management across Community and Enterprise environments.
- Analyze, design, and execute test cases across the end-to-end transactional flow to validate process quality and system behavior.

Research Assistant – Software Engineering Oct 2026 – Present

Escuela Colombiana de Ingeniería Julio Garavito | Bogotá, Colombia

- Support research initiatives in the Software Engineering Foundations area by reviewing literature, designing and running experiments, and documenting findings.
- Keep contributing to Data Models and Services (MYSD) and Object-Oriented Development (DOPO), bringing evidence-based tools and methodologies from current research and industry practice into student projects.

Academic Monitor – Fundamentals of Software Engineering Feb 2026 – Sep 2026

Escuela Colombiana de Ingeniería Julio Garavito | Bogotá, Colombia

- Led the definition of tools, methodologies, technologies, and industry best practices used in student projects for Data Models and Services (MYSD) and Object-Oriented Development (DOPO).
- Supported data modeling and SQL-based solutions in MYSD and object-oriented design with Java in DOPO, promoting clean architecture and maintainable code.

Academic Monitor – Object-Oriented Programming Aug 2025 – Dec 2025

Escuela Colombiana de Ingeniería Julio Garavito | Bogotá, Colombia

- Supported students in Java and object-oriented programming, covering programming fundamentals, software design principles, and problem-solving.

Academic Monitor – Data Models and Databases Feb 2025 – Jun 2025

Escuela Colombiana de Ingeniería Julio Garavito | Bogotá, Colombia

- Guided students in relational database design, data modeling, and SQL development using Oracle SQL Developer.

PROJECTS

LogiFlow – Real-Time Fleet Routing Platform Feb 2026 – May 2026

- Built a cloud-native fleet routing platform with NestJS, Python, PostgreSQL, Redis, Docker, Terraform, and Azure, using microservices, AI-assisted routing, real-time communication, and automated CI/CD pipelines.

CVS Platform – Computer Vision Syndrome Risk Detection Feb 2026 – May 2026

- Developed a distributed cloud platform with Python, FastAPI, Kafka, XGBoost, Kubernetes, Terraform, and AWS for early risk detection through privacy-preserving telemetry and machine learning.

DevSecOps Threat Monitor – LogiFlow Apr 2026 – May 2026

- Integrated a DevSecOps security layer covering SAST, SCA, secrets detection, container scanning, DAST, and runtime monitoring with CodeQL, Semgrep, Trivy, OWASP ZAP, Falco, Prometheus, and Grafana.

Exoplanet ML Classifier – NASA Kepler KOI Apr 2026 – May 2026

- Built a reproducible machine learning pipeline in Python with scikit-learn and XGBoost to classify NASA Kepler data, applying leakage prevention, SMOTE, hyperparameter tuning, and model evaluation.

EDUCATION

B.S. in Systems Engineering Expected 2027
Escuela Colombiana de Ingeniería Julio Garavito | Bogotá, Colombia

High School Diploma – Best Academic Graduate 2021
Gimnasio Corazón de María | Bogotá, Colombia

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, SQL

Web Development: React, Next.js, Angular, NestJS, FastAPI, Three.js

Databases: PostgreSQL, Oracle, Redis, SQL, NoSQL

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, Terraform, Kafka, CI/CD

QA & Security: Software Testing, Test Case Design, BPM Testing (CAP, Bonita), SAST, DAST, SCA, OWASP ZAP, Trivy, Semgrep, CodeQL

AI & Machine Learning: scikit-learn, XGBoost, Hugging Face

Tools & Methodologies: Git, GitHub, Figma, Scrum, Agile, SDLC

Soft Skills: Leadership, Teamwork, Analytical Thinking, Problem-Solving, Creativity, Adaptability

CERTIFICATIONS & COURSES

- AWS Academy Cloud Foundations, Generative AI Foundations, and Machine Learning Foundations – Jul 2026
- Google Cloud Computing Foundations – Jul 2025
- AI Generation: The ABC of Generative AI – Microsoft – Jul 2025
- AWS Academy Cloud Architecting – May 2025
- Databases (4 courses) – edX – Jul 2024
- Python for Computer Science – edX – Jul 2024
- Data Science – MinTIC – May 2024

AWARDS & LEADERSHIP

- Global Finalist, NASA Space Apps Challenge 2025 – top 45 of 18,000+ teams worldwide (ECI Centauri Team)
- Co-author and presenter of a paper and poster at WEEF 2026, Cartagena, Colombia
- Member, University Committee of the Asociación Colombiana de Facultades de Ingeniería (ACOFI)

LANGUAGES

Spanish – Native | English – Advanced (C1)
